DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/19/2006 has been entered.

Response to Arguments

2. Applicant's arguments, see the Request for Reconsideration on page 2, filed 10/04/2005, with respect to the rejection(s) of claim(s) 20-25 under Saito et al. (US 6,137,765) in view of Lee (US 5,768,248) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Akiba (US 6,414,934 B1).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 22-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2653

Claims 22-25 recite the limitation "the guide rails" in the last line of each claim. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

- Claims 24 and 25 are rejected under 35 U.S.C. 102(e) as being anticipated by Akiba (US 6,414,934 B1).

Regarding claims 24 and 25, Akiba discloses an optical disc apparatus comprising:

a base body [14];

a spindle motor [12], provided on the base body, to rotate an optical disk;

an optical pickup [15] to irradiate a light beam on the optical disk to record information on and/or reproduce information from the optical disk;

a chassis [16];

a seek mechanism [col. 5, lines 45-53], provided on the chassis, to move the optical pickup in a radial direction of the optical disk; and

first and second support mechanisms [17 in Fig. 5 or 42 in Fig. 18] respectively supporting the chassis with respect to the base body,

Art Unit: 2653

said chassis [16] being supported in a state free to tilt about an imaginary line connecting the first and second support mechanisms [Figure 4];

both of said first and second support mechanisms supporting the chassis in a manner such that the chassis is movable in directions towards and away from the base body, such that the movement is in a direction perpendicular to the guide rails [19, 20] [col. 5, lines 56-67].

Allowable Subject Matter

5. Claims 20 and 21 are allowed.
6. Claims 22 and 23 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
7. The following is a statement of reasons for the indication of allowable subject matter: .

Claims 20-23 specify an adjustment structure for adjusting a seek mechanism which moves an optical pickup, which requires:

“each of said first and second support mechanisms having a pivot-receiving member, and a pin having a rounded tip end which engages the pivot-receiving member”

Akiba (US 6,414,934 B1) shows support mechanisms [17 or 42] having a pin. Neither show having a pivot-receiving member, and a pin having a rounded tip end, which engages the pivot-receiving member as claimed in the present invention.
